

MANIKANDAN N

Senior Technical Executive – Biostatistician

Email: maninaga6384@gmail.com | LinkedIn: linkedin.com/in/mani2 | Phone: +91 77088 16384 | Villupuram, Tamil Nadu

PROFESSIONAL SUMMARY

Biostatistician with over 3 years of experience in CRO-based clinical research and clinical trial statistics, specializing in statistical analysis, pharmacokinetic (PK) and bioequivalence (BE) studies, CDISC SDTM/ADaM dataset development, SAP authoring, and TLF generation. Proficient in SAS 9.4, SAS Viya, R and Phoenix WinNonlin with strong expertise in statistical programming, clinical data analysis, and regulatory-compliant reporting. Experienced in supporting global regulatory submissions and audits including USFDA, ANVISA, NPRA, and DCGI with zero critical findings. Skilled in survival analysis, MMRM, missing data imputation, randomization, and cross-functional collaboration across Oncology, Dermatology and Ophthalmology. Recently promoted to Senior Technical Executive in recognition of sustained performance and contribution to organizational success. Proven ability to deliver high-quality statistical outputs, ensure regulatory compliance, and support end-to-end clinical trial activities within timelines and quality standards.

CORE COMPETENCIES

Statistical Analysis Plans (SAP) | CDISC SDTM | CDISC ADaM | Pharmacokinetic Analysis (PK) | Bioequivalence (BE) | Non-Compartmental Analysis (NCA) | Clinical Study Report (CSR) | Tables Listings Figures (TLF) | SAS 9.4 | SAS Viya | R Programming | Python | Phoenix WinNonlin | Pinnacle 21 | Sample Size Calculation | Randomisation | MMRM | Survival Analysis | Kaplan-Meier | Cox Proportional Hazards | Logistic Regression | Missing Data Imputation | Multiple Imputation (PROC MI) | ICH GCP E6(R3) | ICH E9(R1) | USFDA Regulatory Submission | EMA Submission | eCTD | define.xml | Pinnacle 21 Validation | Cross-functional Collaboration | Regulatory Compliance | QC and Data Validation | Data Management Plan (DMP) Review | eCRF Review | Protocol Review | Oncology | Dermatology | Ophthalmology | Diabetes

PROFESSIONAL EXPERIENCE

Senior Technical Executive - Biostatistician - Lambda Therapeutic Research, Ahmedabad, Gujarat *Nov 2024 – Present*

Promoted to Senior Technical Executive effective 1 April 2026, in recognition of sustained performance and contributions to the Biostatistics and Programming department.

- Represent Biostatistics department in project discussions and sponsor meetings; ensure statistical compliance with protocol and regulatory requirements
- Work on clinical trials and pharmacokinetic studies
- Support all assigned statistical tasks throughout the project lifecycle, from study start-up activities to preparation and review of statistical analysis reports
- Prepare statistical analysis plans and develop mock-up shells for tables, listings, and figures
- Review DMPs, eCRFs, and study documents for compliance with protocol requirements
- Collaborate with multidisciplinary teams to support on-time execution of statistical deliverables
- Manage and coordinate biostatistics and programming teams to achieve project milestones with quality standards
- Conduct independent reviews of biostatisticians' project deliverables for quality and compliance
- Deliver programming assistance for advanced statistical techniques on demand
- Conduct PK analyses across multiple study designs utilizing Phoenix WinNonlin and SAS
- Apply statistical methods such as t-test, Analysis of Variance, Wilcoxon signed rank test, Wilcoxon rank-sum test, Kruskal-Wallis test, Chi-square test, Fisher's exact test, McNemar's test, Cochran Mantel-Haenszel test, Log-Rank test, Cox Proportional Hazards Model, and missing data imputation techniques (LOCF, Mean, Median, Multiple Imputation)
- Developed and validated SAS programs for efficacy, safety, and PK analyses, including generation of TLFs, QC review, and regulatory-compliant statistical outputs for clinical trial submissions.
- Work across therapeutic areas including Oncology, Dermatology, Ophthalmology and Diabetes

Biostatistician - Azidus Laboratories Ltd., Chennai, Tamil Nadu

Aug 2023 – Oct 2024

- Generation of randomization for the Clinical Studies
- Analyzing pharmacokinetic parameters using Phoenix WinNonlin and SAS
- Preparation of sample size calculation using SAS
- Coordinated with protocol preparation teams in designing the protocol and statistical analytical plan (SAP)
- Verification of protocol deviation for the study
- Preparation and review of pharmacokinetic, statistical report and standard operating procedure
- Creation and validation of CDISC SDTM and ADaM datasets

- Mapping of SDTM and ADaM datasets using Phoenix WinNonlin with Annotated Case Report Form
- Generation of TLFs from SDTM and ADaM datasets using SAS
- Preparation of SDTM and ADaM terminology

SKILLS

Programming Languages:

SAS 9.4, SAS Viya (Administration, Visual Statistics, Custom Steps, Flows, Advanced Visual Analytics), R Programming, Python

Clinical & Statistical Software:

Phoenix WinNonlin 8.7, Pinnacle 21 Enterprise/Community, SAS Studio Analyst, SAS Viya, MS Office (Word, Excel, PowerPoint)

Statistical Methods:

Pharmacokinetic/Pharmacodynamic Analysis (PK/PD), Non-Compartmental Analysis (NCA), Bioequivalence (BE), Mixed Model for Repeated Measures (MMRM), Survival Analysis (Kaplan-Meier, Cox PH), Sample Size Calculation, ANOVA, Linear and Logistic Regression, Missing Data Imputation (LOCF, Multiple Imputation), Exploratory Data Analysis (EDA)

SAS Procedures:

PROC MEANS, PROC FREQ, PROC UNIVARIATE, PROC NPARIWAY, PROC TTEST, PROC ANOVA, PROC GLM, PROC MIXED, PROC REG, PROC PHREG, PROC LIFETEST, PROC LOGISTIC, PROC MI, PROC MIANALYZE, PROC COMPARE, PROC TRANSPOSE, PROC SORT, PROC FORMAT, PROC IMPORT, PROC EXPORT

CDISC Standards:

SDTM domain development (DM, AE, LB, EX, VS, DS, MH, CM, TU), ADaM dataset creation (ADSL, ADAE, ADLB, ADTTE, ADEX), define.xml, Reviewer's Guide, Pinnacle 21 validation, CDISC Pilot submission package

Regulatory Guidelines:

ICH GCP E6(R3), ICH E9, ICH E9(R1) Estimands, US-FDA eCTD Submission, EMA Clinical Data Transparency, ANVISA, NPRA, DCGI, NMPA regulatory requirements

Clinical Documents:

Statistical Analysis Plan (SAP), Clinical Study Report (CSR), Randomisation Scheme, TLF Shells, Regulatory Query Responses, Data Management Plan (DMP) Review, eCRF Review, Protocol Review

EDUCATION

M.Sc. in Statistics Bharathiar University, Coimbatore, Tamil Nadu	2021 – 2023
B.Sc. in Statistics Arignar Anna Government Arts College, Villupuram, Tamil Nadu	2018 – 2021

CERTIFICATIONS

- SAS Viya Administration - SAS Institute
- SAS Visual Statistics in SAS Viya - SAS Institute
- Developing Custom Steps with SAS Studio - SAS Institute
- Managing Data Using Flows in SAS Studio - SAS Institute
- SAS Visual Analytics for SAS Viya - SAS Institute
- Introduction to Statistical Concepts - SAS Institute
- SAS Programming 1: Essentials - SAS Institute
- Statistics 1: Introduction to ANOVA, Regression, and Logistic Regression - SAS Institute
- ICH GCP R3 Expectations - Dr. Alexandru Sirbu (EMA/WHO Inspector)
- Clinical Trials Data Management - Johns Hopkins University
- Clinical Trial Randomisation and Sample Size Calculation – ISCR
- R Programming Language: Beginners to Pro – Udemy
- Data Science: R Programming Complete Diploma 2023 – Udemy

KEY ACHIEVEMENTS

- Promoted to Senior Technical Executive (April 2026) in recognition of sustained performance and contribution
- Authored 35+ Statistical Analysis Plans (SAPs) and contributed to 160+ clinical research statistical analyses across multiple therapeutic areas
- Delivered 130+ Clinical Study Reports (CSRs) and standalone regulatory deliverables across USFDA and EMA submissions
- Generated 190+ randomisation schemes and validated 25+ CDISC datasets using Pinnacle 21 and SAS QC procedures
- Achieved zero critical findings across regulatory audits conducted by USFDA, ANVISA, NPRA and DCGI
